SUMMARY

Software Engineering student and full-stack (MERN) developer with hands-on experience building web apps. Strong background in REST APIs, authentication and performance optimization. Skilled in DevOps and cloud tech (Docker, **Kubernetes: GKE & AKS**) and exploring NLP/machine-learning pipelines (text preprocessing, ANN/RNN/LSTM/transformer models).

PROJECTS

Inventory Management System | [live](#) | React, TypeScript, Vite, Tailwind, Docker, Kubernetes

- Built a **cloud-native inventory management system** using **React 18, TypeScript, and Vite**, enabling efficient product, order, supplier, and customer management.
- Implemented **multi-tenant SaaS architecture** with **PostgreSQL, Supabase, and Row Level Security (RLS)** to ensure secure company-level data isolation.
- Containerized the application using **Docker** and deployed it on **Kubernetes (Minikube single-node cluster)** to demonstrate cloud-native deployment and scalability.

Smart HR Suite — Employee Management System | [live](#) | React, Vite, Tailwind, Supabase, Recharts, TypeScript

- Developed a **multi-tenant HR management platform** using **React, TypeScript, Tailwind CSS, and Supabase** to manage employees, attendance, and company operations.
- Implemented **secure authentication and authorization** using **Supabase Auth and Row Level Security policies** for company-level data protection.
- Built **role-based protected routes and global state management** using **React Context API and React Router v6**

Docsense AI — AI Document Processing Platform | [live](#) | React, Supabase, Google AI (Gemini)

- Developed an **AI-powered document intelligence platform** using **React, TypeScript, and Supabase**, enabling automated document processing and analysis
- Built an **NLP preprocessing pipeline** including **text cleaning, tokenization, and lemmatization** to prepare documents for machine learning models.
- Integrated **Google Gemini AI models** to perform **OCR, document classification, Named Entity Recognition (NER), and automated summarization**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++

Frontend: React.js, Tailwind, Zustand, Redux Toolkit, TypeScript, JavaScript, shadcn/ui (Radix UI)

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Supabase, Firebase, Redis

DevOps: Docker, Kubernetes NGINX, CI/CD (GitHub Actions), Google Kubernetes Engine, Azure Kubernetes Services

NLP/ML: Text preprocessing (tokenization, lemmatization), neural networks (ANN, RNN, LSTM, GRU), transformers (BERT/GPT)

Tools: Git, GitHub, Postman, VS Code, Cloudinary, Jira,

EDUCATION

Comsats University Islamabad, Lahore Campus

BS Software Engineering

2022 – 2026

Lahore, Pakistan

Relevant Subjects: Web Technologies, Database Systems, OOP, Data Structures and Algorithms
